## SUN FACTOR FASHION

Beyond rashies and fishing shirts. Sun Protection clothing doesn't have to be blokey. Think stylish, everyday summer dresses, kaftans and T-shirts, in fabulous colours and prints. The fabrics are UPF 50+ rated with a patented SkinSafe™ Technology. A regular T-shirt has a rating of 5.

A revelation for those with fair skin, sun sensitive skin, allergies to sun screen and those who just want to be more sun safe in our outdoor loving lifestyle. Areas that are exposed and sun burned regularly are the high risk areas. But suspicious moles are still cut from places that don't see the sun much at all. Our incidence of skin cancer is one of the highest in the world, two to three times the rates in Canada, the US and the UK with two in three Australians diagnosed with skin cancer by the time they are 70. Melanoma is the most common cancer in Australians aged 15-44 years.\*

The range also includes rashies with a difference, in a swim fabric that breathes beautifully. Ultra feminine, clever and gorgeous. Ruched sides means they extend from a 'cover the butt' length up to the hips. Classic Tunic styles too. Embroidery details, concealed zips and tassles. A lovely finish to a summer holiday must have.

From the US and proudly online at Sequins and Sand for the first time this summer. The quality is good and the price points are right. We may be better at looking after our kids. But it's time we did more to look after ourselves.
